FLEXCELLENCE
EXTRA

+30% PERFORMANCE:

- **TRIANGULAR CERAMIC GRAIN**
- **FAST AND COMFORTABLE INSTALLATION**
- **MAXIMUM STOCK REMOVAL, NO DUST**
- **EXTENDED LIFE TIME**

GRINDING

GLOBE LATEST INNOVATION IN THE SEMI-FLEXIBLE SANDING DISCS RANGE

PRINCIPAL ADVANTAGES

EXCELLENT
ABRASIVE
CAPACITY

LOW
VIBRATIONS

INCREASED
REMOVAL
SPEED

COST
REDUCTIONS

PRECISE FLATTENING
OF WELDS

LOW
NOISE

FLEXCELLENCE EXTRA is the latest innovation by GLOBE: a semiflexible depressed center ceramic sanding disc with triangle shaped grain and integrated backing pad for a more **PRECISE, FASTER** and **COMFORTABLE** grinding of:

- WELDING SEAMS
- SHARP EDGES
- FLAT, CONVEX AND CONCAVE SURFACES
- IMPERFECTIONS

SPECIAL TRIANGULAR CERAMIC GRAIN

This special shape allows to obtain the maximum stock removal, fast cuts and extremely long life, without overheating the workpiece.

PRECISION

The calibrated flexibility of **FLEXCELLENCE EXTRA** allows extremely precise works compared to the standard grinding wheels and to work exactly where is needed without affecting the surrounding areas.

SPEED

WORKING SPEED: the formulation with ceramic abra-

sive grains together with special cooling fillers allows an extreme removal speed preventing the overheating and the pitting of the working piece.

EASY INSTALLATION: the integrated support avoids the inconvenience to apply the fiberdiscs' traditional backing pad; the installation of **FLEXCELLENCE EXTRA** is as fast as a standard wheel or a flap disc.

COMFORT

To get the best from **FLEXCELLENCE EXTRA**, it should be used with the proper installation kit and at **10-15°** angle with the working surface.

FLEXCELLENCE EXTRA, available in diameters 115 and 125mm is suitable to work on iron, steel and stainless steel (Fe, Cl, S < 0,1%).

Perfect flattening of welds with **FLEXCELLENCE EXTRA**.

MATERIAL	DIMENSIONS (diam. - bore) mm	HARDNESS	USE SPEED	ARTICLE CODE	PLUS LINE
